### **DETAILED ACTION**

1. In an amendment dated, October 12<sup>th</sup>, 2006, the Applicant amended independent claims 1 and 9. Currently claims 1-9 are pending.

#### ***Response to Arguments***

2. Applicant's arguments, see Remarks, filed 10/12/06, with respect to claims 1-9 have been fully considered and are persuasive. The rejection of claims 1-9 have been withdrawn.

#### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: regarding the two independent claims, 1 and 9, of the current application the prior art discloses a majority of the limitations of the claims. Specifically the prior art teaches a liquid crystal display apparatus comprising first and second gate lines, data lines and drive circuitry for said lines. The prior art additionally discloses, the specific pixel circuitry and connections amongst the circuitry of the currently claimed pixel structure. Finally the prior art also teaches the voltage waveforms that are applied to the first and second gate lines.

4. The prior art of record, however, fails to teach alone or in proper combination that a third voltage, that is applied to a second gate line during a non-select period, is substantially the same level throughout successive non-select states. In contrast the prior art presents arguments to alter the non-select voltages amongst successive non-select states.

As independent claims 1 and 9 contain the above undisclosed limitations they are considered allowable on these merits.

Claims 3-8 are dependent upon independent claim 1, and are considered allowable on the same merits shown above.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
